DT-10 Scanner Test Application
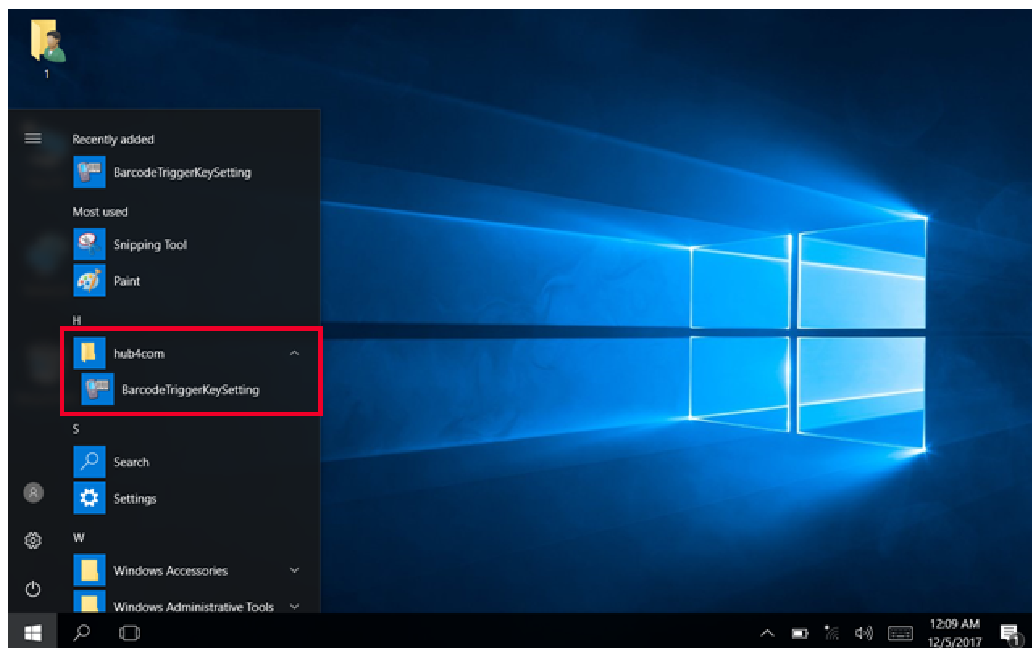

The scanner test application consists of scanner trigger application and COM port re-map application. To install the scanner test application:
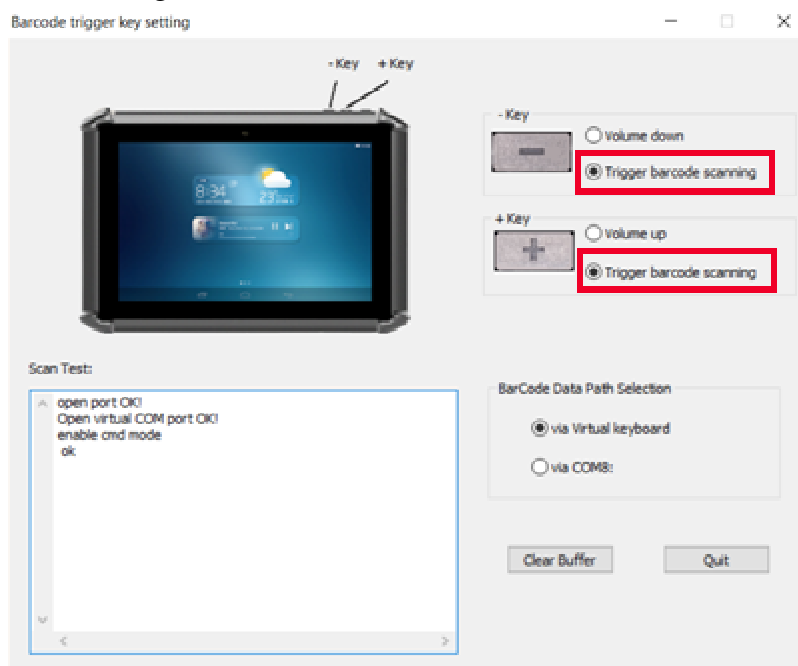

1. Run **hub4com.exe**.
2. Follow the screen instructions to complete the install.
3. Upon the completion, the device will prompt to reboot.

To perform barcode scanning test:

1. Click **Start > hub4com > BarcodeTriggerKeySetting**.

2. Select **Trigger barcode scanning** buttons for the **Volume Up / Down** keys to trigger scanning.

3. Select **"via Virtual keyboard**" or **"via COM8"** as the data output path.

4. Press the **Volume Up** or **Volume Down** key to scan a barcode.
5. The scan result is shown in the **Scan Test** text box.
